Subject Index

A

Adenylate kinase
  allele affecting 32
African buffalo
  karyotype 288–299
Albinism
  inheritance in snails 208–210
  lethal in pearl millet 62
  in peanut seedlings 455–456
Alfalfa
  inheritance of mitochondrial DNA 342
Allozyme analysis
  compared to restriction fragment length polymorphism analysis 18
Ambystoma see Salamanders
Androgenesis
  genetic abnormalities during 26
Anisogamy 171
Anther development
  in petunias 14
Anthocyanin expression
  in morning glories 405
Antilope cervicapra see Blackbucks
Apomixis
  obligate 305–306
  in silk-cotton trees 403
Arabian horses
  white facial markings 73–77
Arachis hypogaea see Peanuts
Arcelin 138
Artificial selection
  of canalization 54, 86–89
  of *Drosophila* hybrids 100–103
Asexual reproduction
  versus sexual 169–170
Asparagus
  allozyme variation 383–386

B

Bactrocera dorsalis see Oriental fruit flies
Bahiagrass
  self-incompatible clones 305–306
Bateson, W. 166–167
Beans
  hybrid weakness 135–139
Biochemical genetics
  work of Haldane 166
Biomphalaria alexandrina see Snails
Biparental inheritance
  in petunias 6
Blackbucks
  karyotype 290
Blastoderm degeneration
  in chickens 249–253
Blueberries
  cytology of 2*n* pollen formation 346–348
Body size
  heritability in fish 43–47
Body weight
  heritability in rabbits 105–108
  and multiple locus heterozygosity 270–274
  in quail 31–35
Bos see Cattle
Bovidae
  chromosome conservation 287–297
Brown skuas
  sex ratios 350–354

C

Callose 12
Canalization
  of bristles in *Drosophila* 49–54, 85–90
  hypothesis 85, 445
Carotenoids 109
Carp
  male sex reversal 431–434
Catharacta lonnbergi see Brown skuas
Cats
  gene frequencies 148–151
Cattle
  karyotypes 288
  X/autosome translocation 451–452
Cavia porcellus see Guinea pigs
Ceiba pentandra see Silk-cotton trees
Cell synchronization 37, 39
Centromere mismatching
  in clawed toad gametes 307
Cerebellar mutant
  of mice 315–318
Chalcone synthase deficiency
  in petunias 11–16
  in maize 11
Chamois
  karyotype 289
Channel catfish
  gene-centromere mapping of enzyme loci 245–248
Chiasmata
  in cotton 4
Chickens
  blastoderm degeneration 249–253
  microphthalmia 152–155
  ptilopody loci 230–234
  replicative chromosomal banding patterns 36–41
Chimeras
  of petunias 9
  of soybeans 71, 72
Chlorophyll
  deficiency in pearl millet 62–63
  deficiency in soybeans 70–72
  levels in mutant maize 112
Chloroplast
  inheritance in pines 419–422
Chromosome-breaking element
  use to study maize mutants 109–112
Chromosome conservation
  in Bovidae 287–297
Clawed toads
  synaptonemal complexes 307–309
Coancestry 68
Coccinella septempunctata see Seven-spotted lady beetle
Codon usage analysis
  program for testing 239–240
Coloration
  in domestic versus wild animals 64
Competition
  effect on body size 43
Computer programs
  for estimating effective population size 310–311
  for estimating restriction endonuclease site positions 240–241
  for mitochondrial DNA analysis 240–241

Restriction Enzyme Analysis Package 157–158
for testing pairwise linkage disequilibria 239
for tracing maternal parent 460
Conditional male fertility
in petunias 11–16
Cotton
mapping chromosome 16 1–4
Coturnix japonica see Japanese quail
Cross-incompatibility
in maize 130–134
Cucumber
linkage of leaf shape with disease resistance 217–220
Cyprinus carpio see Carp

D

Damaliscus lunatus jimela see Topi
Demographic genetics
work of Haldane 165–166
Dendograms
for genetic relationships among dog breeds 373
Depigmentation 435
Desynapsis
in blueberry aneuploids 348
Diamondback terrapins
mitochondrial DNA variability 262–268
Directional selection 169–172
DNA fingerprinting
to assign sex of brown skuas 351–352
to determine parentage in muskrats 356–359
Dogs
statistical analysis of genetic structure 367–373
Drosophila
characters and systematics 182–188
melanogaster
bristle canalization 49–54, 85–90, 445–448
hybridization with *D. simulans* 100–103
latitudinal inversion clines 227–230
pseudoobscura
sex chromosome loss 81–84
relation to *Zaprionus* 299, 311
silvestris
mitochondrial DNA genealogy 211–215

E

Effective population size
method for estimating 309–311
Environment
relation of stability to mode of reproduction 169–173
Equus caballus see Arabian horses
Eumelanin
concentrations in pigeon feathers 64
production in horses 73
Eutherians
analysis of protein sequence data 175–178
Eye size
in chickens 152–155

F

Feathered shank *see* Ptilopody
Fisher-Muller argument 173
Fitness potential 170
Flavonoids
lack of in petunias 11
Freemartinism 393–395
F statistics 367–373
Fumarate hydratase
locus of rat 204

G

Gallus domesticus see Chickens
Gametophyte-sporophyte overlap 26–29
Gazella granti see Roosevelt's gazelle
G-banding patterns
of chicken chromosomes 36–40
of sheep chromosomes 92–99
Gene-centromere mapping
of catfish enzyme loci 245–248
Gene flow
in cat populations 151
in *Orchesella* 277–278
Genetic distance 367
of soybean populations 327–328
Genetic overlap
estimating 27
Genetics instruction 375–398
Genetics literature database 395–397
Genetic variation
influence of effective population size 309
Glycine see Soybeans
Gossypium hirsutum see Cotton
Grapes
allozyme polymorphism 18–21
Greater kudu
karyotype 289
Green swordtails
heritability of body size 43–47
Growth rate
relation to multiple-locus heterozygosity 270–274
Guinea pig
molecular taxonomy and evolution 174–180
Gynogenesis 361–431

H

Haldane, J. B. S. 163–167
Hardy-Weinberg law
program for analyzing deviations from 460–461
Helisoma duryi
role in snail control 208
Heterochrony 224
Heterozygosity
multiple locus and growth rate 270–274
segregational load 237
transmission in blueberries 346, 348
Hutt, F. B. 321
Hybridization
in fish 375
selection for in *Drosophila* 100–103
Hybridogenesis
in salamanders 361
Hybrid weakness
in beans 135–139
Hypotrophic axonopathy
in Japanese quail 234–235

I

Ictalurus punctatus see Channel catfish
Imaging software 41
Inbreeding coefficients
for potatoes 67–70
In situ hybridization 205, 301–304, 452
Insulin
of guinea pigs 174
Introgression
in fish 375–376
in salamander hybrids 362
Ipomoea batatas see Sweet potatoes
Ipomoea purpurea see Morning glories
Ipomoea trifida
inheritance of nectary color 155–156

J

Jaera
enzyme polymorphism 388–392
Japanese quail
atypical mitotic metaphase in embryos 146–148
genetic variability 31–35
hypotrophic axonopathy mutant 234–235

K

Kaneshiro hypothesis 211
Kapok trees *see* Silk-cotton trees
Kobus ellipsiprymnus see Waterbucks

L

Lentils
conservation of linkages with peas 123–128
Linkage
disequilibrium of facial markings in horses 73, 75–77
evaluation of tests 143–146
program for testing 239

M

Maize
  cross-incompatibility 130–134
  genetic variability in synthetic 410–417
  meiotic mutants 335–340
  mutator transposable elements 114–117
  phytoene mutant 109–112
Malaclemys terrapin see Diamondback terrapin
Male sterility
  in soybeans 457–459
Material inheritance
  in petunias 6
Maternal parent
  program for tracing 460
Mather's linkage test 143–146
Mating asymmetries 211
Maximum parsimony method 175
Medicago sativa see Alfalfa
Megaspore mother cells
  analysis 335–336
Meiotic mutants
  of maize 335–340
Melanin
  concentrations in pigeon feathers 64–67
Melanocyte loss 435
Mendelian segregation
  evaluation of tests based on 143–144
Microphthalmia
  in chickens 152–155
Microplitis croceipes see Parasitic wasps
Microsporogenesis
  in blueberry aneuploids 348
Minisatellite sequence
  of rat renin gene 204–207
Mitochondrial DNA
  of diamondback terrapin subspecies 262–268
  genealogy of *Drosophila silvestris* 211–215
  inheritance in alfalfa 342–345
  program for analysis 240–241
  variability among coastal marine species 266
Mitotic anomalies
  in quail embryos 146–148
Monte-Carlo simulation 144
Morning glories
  white flower color gene 405–409
Morone hybrids
  use of oncogene probes to identify 375–381
Mice
  abnormal spermatozoon headshape locus 56–60
  mandible shape in testicular feminization strain 235–237
  rostral cerebellar malformation 315–318
  vit gene 435–438
Muskrats
  DNA fingerprinting to determine parentage 356–359

N

Natural selection
  for canalization of bristles in *Drosophila* 54
Nei's genetic distance 149
Neutralist-selectionist debate 31
Nondisjunction
  in *Drosophila* 83

O

Oncorhynchus see Salmon
Oncogene probes
  to identify hybrids 375–381
Ondatra zibethicus see Muskrats
Orchesella
  genetic diversity and taxonomy 275–280
Oriental fruit flies
  linkage of eye color genes 199–203
Oryctolagus cuniculus see Rabbits
Oryx
  karyotype 289
Otala lactea see Snails, land
Ovis aries see Sheep

P

Pachytene chromosome analysis
  in soybeans 221–223
Paedomorphosis 224
Pairwise linkage disequilibria
  program for testing 239
Parasitic wasps
  black abdomen mutant 448–450
Parentage
  assessing by DNA fingerprinting 356–359
Parsimony 175, 183, 190–195
Paspalum notatum see Bahiagrass
Paulownia
  inheritance of isozyme phenotypes 140–143
Pavloff feathering 231
Peanuts
  albinism 455–456
Pearl millet
  color mutants 386–388
  gametophyte-sporophyte overlap 26–29
  inheritance of xantha terminalis 62–63
Peas
  conservation of linkages with lentils 123–128
Pedigree analysis
  program for tracing maternal parent 460
Pennisetum see Pearl millet
Peptidase
  locus of rats 204
Pericarp color
  of sorghum 330–334
Petunias
  biparental inheritance of plastids 6–10
  conditional male fertility 11–16
Phaseolus vulgaris see Beans
Pheasants
  cDNA cloning of Z- and W-linked gene 22–25
Pheomelanin
  concentrations in pigeon feathers 64
  production in horses 73
Phylogenetic analysis 183, 190, 212
Physa heterostropha see Snails, freshwater
Phytoene 109
Piebald spotting 149
Pigeon
  melanin concentration in feathers 64–67
Pines
  paternal chloroplast DNA inheritance 419–422
Pisum sativum see Peas
Plastid
  development in pearl millet 62–63
  inheritance in alfalfa 342–345
  inheritance of transfer capacity 6–10
Pleiotropy
  of facial markings in horses 73, 75–77
Ploidy elevation
  in salamanders 361
Pollen
  competition 26
  formation
    in blueberry aneuploids 346–348
    in potatoes 119–122
  morphology 13
Pollen mother cells
  cytological analysis 335–336
Pollen tube growth
  measuring 12
Pollination
  by bats 401
Polymerase chain reaction analysis 196
Population founding 423
Population genetics
  work of Haldane 164–165
Porcine microsatellites
  cloning and characterization 196–198
Postmeiotic transcription
  in pearl millet 26, 28
Potatoes
  covariance between hybrids 119–122
  inbreeding coefficients 67–70
Precocious maturation
  in salmon 282–285
Ptilopody
  in chickens 230–234

Q

Q-band karyotypes
  of Bovidae 291, 451

R

Rabbits
heritability of body weight 105–108
Radiation genetics
work of Haldane 166
Rats
minisatellite sequence of renin gene 204–207
R-banding 36–41
Receptivity
relationship to hybridization 101, 103
Reconstitution
in diploid salamanders 361–365
Recurrent selection methods 410
Renin
gene of rats 204–207
Reproductive isolation
in beans 138
in Bovidae 287
mechanisms 100
Restriction endonuclease site positions
program for estimating 240–241
Restriction data
program for analyzing 157–158
Restriction fragment length polymorphism analysis
of grapes 18–21
of Viceae 124
Robertsonian translocations
in Bovidae 291–292
in freemartin heifers 393–395
Rodentia
classification and morphology 179–180
Roosevelt's gazelle
karyotype 290
Rose clover
isozyme variation 423–429
Rupicapra rupicapra see Chamois

S

Salamanders
biochemical plasticity 224–226
hybrids 361–365
Salmon
estimating effective population size 309–311
precocious maturation 282–285
Schistosoma mansoni 255, 260
Segregational load 237
Seven-spotted lady beetle
gene flow 440–444
Sex chromosome loss 81–84
Sex identification techniques 22–25
Sex ratios
of brown skuas 350–354
Sex reversal
in carp 431–434
Sexual dimorphism
of mandible shape in mice 235–237
Sexual monomorphism
in birds 22
Sexual reproduction
advantages 169–173
Sheep
G-banding studies 93–99
Silk-cotton trees
phenology and mating system 401–404
Simple contingency analysis 143–146
Single-locus polymorphisms
displacement 237–238
Snails
freshwater
albinism 208–210
land
multiple-locus heterozygosity 270–274
population genetics in Egypt 255–260
Solanum see Potatoes
Sorghum
pericarp and testa genotypes 330–334
Soybeans
chlorophyll-deficient mutants 70–72
genetic diversity in wild 325–328
male sterile 457–459
primary trisomics 221–223
Spermatogenesis
in mice 56, 60
Stable flies
subcostal incomplete mutant 453–454
Starch gel electrophoresis
of asparagus isozymes 383
to determine snail genotypes 271
of *Orchesella* isozymes 276
of *Paulownia* isozymes 140
of silk-cotton tree isozymes 402
Stomoxys calcitrans see Stable flies
Sweet potatoes *see also Ipomoea trifida*
relatives of 155–156
Synaptonemal complexes
of clawed toads 307–309
Syncerus caffer caffer see African buffalo

T

Tannin
in sorghum 330
Telocentric chromosomes
use in maize 339–340
Testa color
of sorghum 330–334
Testicular feminization
in mice 235
Thyroxine
effect in salamanders 224
Topi
karyotype 290
Tragelaphus strepsicerus see Greater kudu
Transposable elements
of maize 114–117
Trifolium hirtum see Rose clover
Turkeys
cDNA cloning of Z- and W-linked gene 22–25

U

Uniparental-maternal inheritance 342

V

Vaccinium see Blueberries
Viceae *see also* Lentils; peas
common linkage groups 123–125
Vitilago 435
Vitis see Grapes

W

Waterbucks
karyotype 289–290
Weldon, W. F. R. 167

X

Xantha terminalis
inheritance in pearl millet 62–63
Xenopus laevis see Clawed toads
Xiphophorus helleri see Green swordtails

Z

Zaprionus
gene mapping 299–304
salivary gland chromosome map 311–315

Title Index

A

An advantage of sexual reproduction in a rapidly changing environment 169
Allozyme variation and genetics in asparagus 383
Atypical mitotic metaphase in Japanese quail embryos: a possible recessive lethal mutation 146

B

Biochemical plasticity in the Arizona tiger salamander (*Ambystoma tigrinum nebulosum*) 224
Blastoderm degeneration, an early embryonic failure in dwarf Single Comb White Leghorn chickens 249

C

Canalization at two extra scutellar bristles: artificial selection, chromosome analysis, and effect of temperature 85
A case of 1/29 Robertsonian translocation in both cellular lines of a freemartin heifer 383
cDNA cloning of a Z- and W-linked gene in gallinaceous birds 22
Characteristics and inheritance of xantha terminalis in pearl millet 62
Characters and the systematics of Drosophilidae 182
Chromosome conservation in the Bovidae 287
Cloning and characterization of highly polymorphic porcine microsatellites 196
CODONS: A microcomputer program for codon usage analysis 239
Common white facial markings in Arabian horses that are homozygous and heterozygous for alleles at the *A* and *E* loci 73
Comparative F statistics analysis of the genetic structure of ten Spanish dog breeds 367
A comparison of genetic variability in strains of Japanese quail selected for heavy body weight 31
A computer program for testing pairwise linkage disequilibria in subdivided populations 239
Conditional male fertility in chalcone synthase-deficient petunia 11
Covariance between haploid-species hybrid and *Tuberosum* × haploid-species hybrid in 4*x*-2*x* crosses of *Solanum tuberosum* L. 119
Cytological evidence for four new primary trisomics in soybean 221
Cytology of 2*n* pollen formation in a blueberry aneuploid ($2n = 4x + 9 = 57$) 346
Cytoplasmically inherited albinism in peanut seedlings 455

D

Discordant inheritance of mitochondrial and plastid DNA in diverse alfalfa genotypes 342
On the displacement of single-locus polymorphisms 237

E

Early and late replicative chromosomal banding patterns of *Gallus domesticus* 36
Extensive conservation of linkage relationships between pea and lentil genetic maps 123

F

Fifty Years of Genetic Load: An Odyssey (book review) 159
Frederick Bruce Hutt (1897–1991) (in memoriam) 320
From the classroom to the literature in genetics instruction 395
Further evidence for latitudinal inversion clines in natural populations of *Drosophila melanogaster* from India 227

G

Gametophyte-sporophyte genetic overlapping in pearl millet (*Pennisetum typhoides*): evidence of postmeiotic expression of isozymic loci 26
Gene-centromere mapping of six enzyme loci in gynogenetic channel catfish 245
Gene flow in populations of the seven-spotted lady beetle, *Coccinella septempunctata* 440
Gene frequencies in the cat population of Buenos Aires, Argentina, and the possible origin of this population 148
GENET2: A BASIC program for the analysis of deviations from Hardy-Weinberg law 460
Genetic analysis of restriction fragment length polymorphisms in *Vitis* 18
Genetic characterization of a black abdomen mutant in *Microplitis croceipes* (Hymenoptera: Braconidae) 448
Genetic diversity in natural populations of wild soybean in Iwate Prefecture, Japan 325
Genetic diversity and taxonomy in soil-dwelling insects: the genus *Orchesella* 275
Genetics of five cytoplasmically inherited yellow foliar mutants in soybean 70
Genetics of red and purple plant color in pearl millet 386
Genetic variability as affected by selection in Iowa Stiff Stalk Synthetic maize 410

H

Heart leaf, a recessive leaf shape marker in cucumber: linkage with disease resistance and other traits 217
Heritability of body size of green swordtails, *Xiphophorus helleri*: I. Sib anal-

yses of males reared individually and in groups 43
Heritability of 90-day body weight in domestic rabbits from tropical Ghana, West Africa 105
High-resolution G-banding of sheep chromosomes 92
Hybrid weakness in wild *Phaseolus vulgaris* L. 135
The hypotrophic axonopathy mutant in Japanese quail 234

I

Identification of an autosome to X chromosome translocation in the domestic cow 451
Identifying the ptilopody (feathered shank) loci of the chicken 230
The inheritance of albinism in a freshwater snail, *Physa heterostropha* 208
Inheritance of the capacity to transfer plastids by the pollen parent in *Petunia hybrida* Hort. 6
Inheritance of isozyme phenotypes of the native *Paulownia* spp. in Taiwan 140
Inheritance of nectary color in *Ipomoea trifida* 155
Instability of the minisatellite sequence in the first intron of the rat renin gene and localization of the gene to chromosome 13q13 between FH and PEPC loci 204
Interrelationship of brown and purple testa genes with pericarp and other testa genes in *Sorghum bicolor* 330
Isozyme screening of near-isogenic male sterile soybean lines to uncover potential linkages: linkage of the *Pgm1* and *ms2* loci 457
Isozyme variation in California and Turkish populations of the colonizing species *Trifolium hirtum* 423

L

Linkage analysis of five new genetic markers of the Oriental fruit fly, *Bactrocera dorsalis* (Diptera: Tephritidae) 199

M

Male sex reversal in gynogenetic XX females of common carp (*Cyprinus carpio* L.) by a recessive mutation in a sex-determining gene 431
Mandible shape analysis in a testicular feminization (*Tfm*) strain of mice 235
Mapping of the *azh* locus to mouse chromosome 4 56
Mapping of the cl_1, R_1, yg_1, and *Dw* loci in the long arm of chromosome 16 of cotton 1
Mating system and phenology of *Ceiba pentandra* (Bombacaceae) in central Panama 401
Melanin concentrations in feathers from wild and domestic pigeons 64
Metchnikoff and the Origins of Immunology: From Metaphor to Theory (book review) 319
Microphthalmia-4: a sex-influenced inherited eye condition of the chicken 152
Molecular and population genetic aspects of mitochondrial DNA variability in the diamondback terrapin, *Malaclemys terrapin* 262
The molecular taxonomy and evolution of the guinea pig 174
The mtDNA genealogy of closely related *Drosophila silvestris* 211
Mutator transposable elements that occur in clusters in the maize genome 114

P

Paternal chloroplast DNA inheritance in *Pinus contorta* and *Pinus banksiana*: independence of parental species or cross direction 419
Population Genetics: Diversity and Stability (book review) 78
Population genetics of Egyptian *Biomphalaria alexandrina* (Gastropoda, Planorbidae) 255
Precocious maturation in coho salmon (*Oncorhynchus kisutch*): estimation of the additive genetic variance 282
Production of aneuploid and diploid eggs by meiotic mutants of maize 335
Profiles in genetics: J. B. S. Haldane (1892–1964)—a centennial appreciation 163
A program for the estimation of restriction endonuclease site positions from restriction fragment size and number: an aid for mitochondrial DNA analysis 240
A program in PASCAL for tracing the maternal parent in pedigree analysis 460

R

REAP: an integrated environment for the manipulation and phylogenetic analysis of restriction data 157
Reconstitution of diploid *Ambystoma jeffersonianum* (Amphibia: Caudata) in a hybrid, triploid egg mass with lethal consequences 361
Response to selection for increased hybridization between *Drosophila melanogaster* females and *D. simulans* males 100
Rostral cerebellar malformation, (*rcm*): a new recessive mutation on chromosome 3 of the mouse 315
The RSS system of unidirectional cross-incompatibility in maize: I. Genetics 130

S

Salivary gland chromosome map of *Zaprionus inermis* 311
Selection for canalization at extra dorsocentral and scutellar bristles in *Drosophila melanogaster* 445
Selection for canalization at two extra dorsocentral bristles in *Drosophila melanogaster* 49
Sex chromosome loss induced by the "sex-ratio" trait in *Drosophila pseudoobscura* males 81
A sex-linked enzyme polymorphism in the marine isopod *Jaera ischiosetosa* 388
Sex-specific restriction fragments and sex ratios revealed by DNA fingerprinting in the brown skua 350
Signal, noise, and reliability in molecular phylogenetic analyses 189
Size, growth rate, and multiple-locus heterozygosity in the land snail (*Otala lactea*) 270
Some aspects of inbreeding in derived tetraploids of potatoes 67
Statistical method for estimating the effective population size in Pacific salmon 309
Subcostal incomplete: a new genetic mutant of *Stomoxys calcitrans* L. (Diptera: Muscidae) 453
Synaptonemal complexes of *Xenopus laevis* 307

U

Unstable white flower color genes and their derivatives in the morning glory 405
Use of cellular oncogene probes to identify *Morone* hybrids 375
On the use of the classical tests for detecting linkage 143
Use of DNA fingerprinting to determine parentage in muskrats (*Ondatra zibethicus*) 356
Use of a *Ds* chromosome-breaking element to examine maize *Vp5* expression 109
Using apomictic tetraploids to make a self-incompatible diploid Pensacola bahiagrass clone set seed 305

V

The *vit* gene maps to the *mi* (microphthalmia) locus of the laboratory mouse 435

Z

Zaprionus tuberculatus: chromosome map and gene mapping by DNA in situ hybridization 299
